

SAUMYA KUMAR DAS

DATA SCIENCE & PYTHON PROGRAMMER

✉ dassaumya13@gmail.com | ☎ 9804740881 | 📍 New Plaza, Putalisadak | 🌐 www.saumyadas.com.np

PROFILE

Python programmer and data science practitioner with hands-on experience building machine learning and NLP models, data analysis pipelines, and interactive visualizations using Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, and Plotly. Skilled in data cleaning, exploratory data analysis, statistical evaluation, and end-to-end model development, with working knowledge of Django for backend integration and REST APIs. Strong problem-solving foundation backed by academic training in Data Structures & Algorithms and Object-Oriented Programming.

EDUCATION

Lincoln University College

Bachelor in Information Technology
Nov 2024 – Present

Clouds Nepal Web

Python, Django & Data Science Diploma
Jun 2026 – Sep 2026

SKILLS

Languages: Python, Java, C

Data Science & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly, Statistical Analysis, Data Cleaning & Wrangling, Exploratory Data Analysis (EDA), Natural Language Processing (NLP), Machine Learning

Web & Backend: Django, REST APIs, HTML5, CSS3

Databases: MySQL

Tools: Jupyter Notebook, Git, GitHub, VS Code, PyCharm

Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, REST API Design

PROJECTS

Machine Learning & NLP - Fake News Detection System | Jun 2026 - Jul 2026

- Built a text classification system using Scikit-learn and NLP techniques to detect fake news articles, including preprocessing, feature extraction, and model training.
- Developed an end-to-end prediction pipeline in Python for reliable real/fake classification on news datasets.

Machine Learning & NLP - Language Detection Model | May 2026 - Jun 2026

- Developed an end-to-end language classification pipeline using Python, Scikit-learn, and NLP techniques to identify the language of input text across multiple languages.
- Performed text preprocessing and feature extraction (tokenization, vectorization) to improve model classification accuracy on multilingual datasets.

Google Search Trend Analysis with Python | Apr 2026 - May 2026

- Analyzed search trends and user interest patterns using Pytrends, Pandas, and Plotly, producing interactive trend-mapping dashboards.

E-Commerce Data Analysis with Python | Mar 2026 - Apr 2026

- Cleaned and analyzed real-world transaction data with NumPy, Pandas, and Seaborn to identify sales trends and customer behavior patterns for business decision-making.

Uber Ride Data Analysis with Python | Feb 2026 - Mar 2026

- Analyzed ride-demand patterns, peak booking hours, and trip trends from real-world Uber trip data using Pandas and NumPy.
- Built visualizations with Matplotlib and Seaborn to surface actionable insights for demand forecasting.

J.A.R.V.I.S - OpenAI + Python Powered AI Desktop Assistant | Jan 2026 - Feb 2026

- Built a Python-based AI desktop assistant with conversational capabilities and real-time voice interaction using speech recognition and text-to-speech.
- Automated everyday desktop tasks (opening applications, web searches, query handling), improving user productivity through hands-free voice control.

EXPERIENCE

Technical Assistant — SUBISU Cablenet Pvt. Ltd. | Jun 2018 - Feb 2019

- Assisted in maintenance and support of enterprise-level network systems within the IP Engineering Department.
- Monitored network performance and analyzed operational data to identify connectivity issues and bottlenecks.
- Coordinated across departments to resolve technical issues and support smooth operational workflow.

Data Entry Associate — Pracheen Mantra Yantra Vigyan | Aug 2014 - Nov 2017

- Managed data entry and record-keeping for customer information, shipment details, and operational documentation.
- Coordinated packaging, labeling, and documentation for domestic and international parcel dispatch.
