9804740881

New Plaza, Putalisadak

---

## PROFILE

I am a passionate computer programmer with a strong understanding of programming fundamentals, software development principles, and problem-solving techniques. I have experience writing, testing, debugging, and maintaining code to develop efficient and user-friendly applications. Through various academic and personal projects, I have gained practical exposure to different programming languages, development tools, and modern technologies, which has strengthened both my technical and analytical skills.

---

## EDUCATION

**Lincoln University College, Nov 2024 - Present**

Bachelor in Information Technology

**Clouds Nepal Web, June 2026 - Sep 2026**

Python, Django and Data Science Diploma

---

## EXPERIENCE

**Technical Assistant | SUBISU Cablenet Pvt. Ltd., June, 2018 - February, 2019**

- Worked as a Technical Assistant in the IP Engineering Department, assisting in the maintenance and support of enterprise-level network systems and infrastructure.
- Responded to technical inquiries and support requests through phone calls, emails, and in-person communication, ensuring timely and effective resolution of issues.
- Provided accurate technical information and guidance to clients and internal teams while maintaining professional communication and customer service standards.
- Coordinated with multiple departments and technical teams to ensure smooth workflow, efficient issue resolution, and successful completion of operational tasks.
- Assisted in monitoring network performance and analyzing network-related information to identify connectivity issues, bottlenecks, and system inefficiencies.

**Data Entry & Post Office Guy | Pracheen Mantra Yantra Vigyan, August, 2014 – November, 2017**

- Worked in data entry and postal operations, handling customer records, shipment details, and administrative tasks with accuracy and efficiency.
- Managed data entry tasks including maintaining customer information, updating shipment records, and organizing operational documents.
- Prepared and processed postal packages for domestic and international delivery through the Post Office of Jodhpur.
- Coordinated the packaging, labeling, and documentation of parcels to ensure accurate and timely dispatch to customers across India and foreign countries.

# SKILLS

**Languages:** Python, Java, C

**Frontend:** HTML5, CSS3

**Backend:** Django

**Databases:** My SQL

**Libraries & Tools:** Pandas, NumPy, Matplotlib, Seaborn, Plotly, Git, GitHub, VS Code, PyCharm

**Concepts:** REST APIs, OOP, Data Structures & Algorithms, Machine Learning

---

## PORTFOLIO/KEY PROJECTS

### Machine Learning & NLP Project on Language Detection, February 2025 – March 2025

- Developed a Language Detection model using Machine Learning and Natural Language Processing (NLP) to accurately identify the language of input text.
- Performed text preprocessing, feature extraction, and model training to improve classification accuracy on multilingual datasets.
- Built an end-to-end language classification pipeline using Python, Scikit-learn, Pandas, and NLP techniques for efficient and reliable language prediction.

### Google Search Analysis with Python, February 2025 – March 2025

- Developed a Google Search Analysis project to analyze search trends and user interest using data visualization and trend mapping techniques.
- Performed data analysis and created interactive visualizations using Python, Pandas, Matplotlib, Plotly, and Pytrends to generate actionable insights from search data.

### E-Commerce Data Analysis with Python, January 2025 – February 2025

- Performed E-Commerce data analysis to identify sales trends, customer behavior, and business performance using real-world transaction data.
- Utilized Python, NumPy, Pandas, Seaborn, and Plotly to clean, analyze, and visualize data, enabling data-driven insights for business decision-making.

### Uber Data Analysis with Python, December 2025 – January 2026

- Analyzed Uber ride data to identify ride demand patterns, peak booking hours, and trip trends using data analysis techniques.
- Applied Python, Pandas, NumPy, Matplotlib, and Seaborn for data cleaning, preprocessing, and visualization to generate actionable insights from ride data.

### J.A.R.V.I.S – OpenAI + Python Powered AI Desktop Assistant, April 2026 – May 2026

- Developed J.A.R.V.I.S, a Python-based AI desktop assistant with human-like conversational capabilities and voice interaction.
- Implemented speech recognition and text-to-speech to process voice commands and provide natural, real-time responses.
- Automated everyday desktop tasks such as opening applications, performing web searches, and answering user queries, improving productivity through voice control.
