---

## PROFILE

I am a passionate computer programmer with a strong understanding of programming fundamentals, software development principles, and problem-solving techniques. I have experience writing, testing, debugging, and maintaining code to develop efficient and user-friendly applications. Through various academic and personal projects, I have gained practical exposure to different programming languages, development tools, and modern technologies, which has strengthened both my technical and analytical skills.

---

## EDUCATION

### Lincoln University College

Bachelor in Information Technology

### Broadway Infosys

Diploma in Flutter Framework

---

## EXPERIENCE

### Technical Assistant | SUBISU Cablenet Pvt. Ltd., June, 2018 - February, 2019

- Worked as a Technical Assistant in the IP Engineering Department, assisting in the maintenance and support of enterprise-level network systems and infrastructure.
- Responded to technical inquiries and support requests through phone calls, emails, and in-person communication, ensuring timely and effective resolution of issues.
- Provided accurate technical information and guidance to clients and internal teams while maintaining professional communication and customer service standards.
- Coordinated with multiple departments and technical teams to ensure smooth workflow, efficient issue resolution, and successful completion of operational tasks.
- Assisted in monitoring network performance and analyzing network-related information to identify connectivity issues, bottlenecks, and system inefficiencies.

### Data Entry & Post Office Guy | Pracheen Mantra Yantra Vigyan, August, 2014 – November, 2017

- Worked in data entry and postal operations, handling customer records, shipment details, and administrative tasks with accuracy and efficiency.
- Managed data entry tasks including maintaining customer information, updating shipment records, and organizing operational documents.
- Prepared and processed postal packages for domestic and international delivery through the Post Office of Jodhpur.
- Coordinated the packaging, labeling, and documentation of parcels to ensure accurate and timely dispatch to customers across India and foreign countries.

## SKILLS

- Professionalism and Work Ethics : Committed to maintaining professional standards, reliability, accountability, and a strong work ethic while ensuring quality service and operational excellence.
  - Coordination and Team Collaboration : Able to coordinate effectively with multiple departments and teams to ensure smooth communication, faster issue resolution, and successful completion of operational and technical tasks.
  - Problem-Solving and Analytical Thinking : Strong analytical mindset with the ability to assess problems, identify root causes, and recommend practical and efficient solutions in technical and operational environments.
- 

## PORTFOLIO/KEY PROJECTS

### **E-commerce App & Weather App | Flutter Framework, June 2025 - August 2025**

- Designed and developed complex, user-friendly mobile application interfaces using Flutter widgets, implementing responsive layouts and adaptive UI components to ensure seamless performance across different screen sizes and devices.
- Integrated REST APIs and handled JSON data parsing efficiently by creating structured Dart data models to manage and display dynamic weather information received from external API responses.
- Implemented smooth navigation and routing systems within the application, ensuring intuitive user experience, efficient screen transitions, and organized application flow.
- Optimized application performance by improving rendering efficiency, smooth scrolling behavior, and UI responsiveness while enhancing visual clarity through the use of custom fonts, weather icons, and reusable Flutter components.

### **Bank Management System & Electricity Billing System | Java Swing, February 2025 - April 2025**

- Developed a strong foundation in Core Java programming by working extensively with object-oriented programming concepts such as classes and objects, encapsulation, inheritance, polymorphism, abstraction, and method overriding to build structured and reusable applications.
- Designed and developed graphical user interfaces using Java Swing components including JFrame, JPanel, JButton, JTextField, JLabel, JTable, and other UI elements to create interactive and user-friendly desktop applications.
- Implemented GUI functionalities and application logic using event handling mechanisms, action listeners, form validation techniques, and user input processing to improve application interactivity, usability, and data accuracy.
- Integrated Java applications with MySQL databases using JDBC connectivity for performing database operations such as data insertion, retrieval, updating, and deletion while implementing real-world business logic and maintaining efficient data management workflows.
